

Product name: UNUS

Team name: Bigas Unus (team one)

Release date: June 16, 2023

Definition of Done(s)/Style Guidelines

User Story Implementation:

- All user stories related to music playback from SoundCloud and Spotify APIs are implemented according to the specified requirements.

Code Development:

- All code is written following the Flask web framework best practices and adheres to the project's coding guidelines.
- Code is reviewed and approved by team members or peers.

Unit Testing:

- Unit tests are written to cover the critical functionality of the app, including SoundCloud and Spotify API/widget integration.
- Unit tests are executed, and all tests pass successfully.

User Interface (UI) and User Experience (UX):

- The UI is responsive, visually appealing, and user-friendly.
- Users can easily navigate the app, and all interactive elements work as expected.

API Integration:

- The app successfully integrates with both SoundCloud/Spotify API/Widgets, allowing users to play music from both platforms.

Error Handling:

- Appropriate error handling is implemented to handle API failures, network issues, and other potential errors gracefully.
- Error messages are user-friendly and help users understand any issues that may occur.
