Sprint Report #2
Product Name: UNUS

Team Name: BIGAS UNUS

July 17, 2023

Actions to stop doing:

- More solidly coordinate workflow in conjunction
- Getting side tracked on website development (focus more on API connection)

Actions to start doing:

- Have more standup meetings
- Read more in depth about API information

Actions to keep doing:

- Productive meetings
- Almost daily/regular standups
- Familiarizing with the sqlalchemy database
- Working on api connection and implementation.

Work completed

- Database research
- Api research
- Looked into how to connect the api's web application using html.(more to be researched)

Work not completed:

- Showing playlist on website through html integration
- Storing user tokenization within the sqlalch DB
- Implementing a widget/embeded player for the website
    - One for the login of the api
    - Another for the player of the music

<u>Work completion rate:</u>

- 30 hours total work estimated. A lot of research this sprint, more than anticipated however we planned for sprint three to be easier due to our lack of knowledge in these fields and knowing that we would have to research a lot with the api's and sdk's.
